

Payroll Newsflash

PAPERLESS

We are pleased to announce the implementation of PAPERLESS, a solution that facilitates and secures the encoding of your employees' timescores.

From the online software, it is possible to encode all the information related to your employees' timescores (sick leave, leave, daily hours, etc...).

This software is compliant with GDPR expectations and secure as your data is hosted on our servers.

Do not wait any longer and contact us so that we can organise an information meeting.
